DETAILED ACTION

Reasons of Allowance

1. The following is an examiner's statement of reasons for allowance: claims 1, 3, 5, 7, 9, 10, 13, 14, 17, 18, 21, 22, 25, and 26 are allowable over the prior art of record for the reasons as stated in the Applicant's amendment filed on August 17, 2006 pages 6 – 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. In this case, the prior art teaches a satellite communication system where supplemental processing can be performed aboard a supplemental satellite launched after the first satellite, and the second satellite compliments the system with a supplemental processor in order to enhance the processing capabilities of the system, and space-based server network architecture which permits on demand transfer of mission and control data between client satellites it an orbit in an earth station irrespective of the location of the client satellites relative to the earth station.

None of the prior art of record teaches or fairly suggests that a satellite communication system using function sharing by the various satellites, by processing a

circuit switching unit for a data link layer and a network layer, the second satellite can process baseband signals, and a network protocol defined by ISO with a bottom layer being a physical layer which specifies an electrical interface of physical media and basic modulation techniques, and the second satellite governs the electrical interface in the physical layer while the third satellite carries out not only the signal processing relating to the modulation technique which is at a relatively high position in the physical layer, and together with combination of other element as set forth in the claims.
